SUMMARY

Frontend developer with a passion for React, Next.js, and modern JavaScript. Always eager to learn new things and love sharing my knowledge with others. I see challenges as opportunities to grow and thrive in team environments. Looking for exciting projects and creative teams where I can make a real impact.

PROJECTS

Torino Project

📅 Date period 📍 Location

Github

- **Torino is a travel booking platform that allows users to easily search, filter, and book various tours. It features secure authentication, user-friendly booking management, and a responsive design for a seamless experience across all devices. For optimal SEO performance, the pages are effectively managed using SSG and SSR to handle both static and dynamic content efficiently.**
- Next.js15,TailwindCSS,React Query,React Hook from,yup

Divar

📅 Date period 📍 Location

Demo Github

- **Developed a classified ads web application similar to Divar, featuring user authentication, ad posting & management, category-based filtering, and advanced search functionality. Built with a responsive UI and scalable architecture.**
- React.js18,ReactQuery

Blog-App

📅 Date period 📍 Location

Demo Github

- **Developed a public blog platform powered by GraphQL, featuring post creation and editing with a rich-text editor, image uploads, category and tag management, comments, and pagination — built with a clean, responsive, and SEO-friendly UI.**
- React.js19,Material-UI-GraphQL

Crypto

📅 Date period 📍 Location

Demo Github

- **A cryptocurrency tracking application developed with React that displays real-time market data. This app uses the CoinGecko API to fetch price data and includes pagination, search functionality, and interactive charts to visualize the price trends of cryptocurrencies.**
- React.js18

EDUCATION

Botostart bootcamp

Botostart

📅 05/2024 - 12/2024

Software Engineering Student
